## BACKSTAGE & SCENOGRAPHY

### GERTRUDE THE CRY

By Howard Barker. Design and Staging IDEAL FOR STUDENTS OF THEATRE DESIGN AND DIRECTION

This DVD documents the creative decisions that informed the reading, design, direction and staging of Howard Barker play Gertrude the Cry. Designed and directed by Serge Tampalini, this complex tale of the crime at the heart of Shakespeare's Hamlet is staged with startling imagery that is as complex as the tale. Those familiar with Barker's work will know that where other playwrights might clarify a scene, Barker seeks to render it more complex, ambiguous and unstable, fragmenting response and forcing each spectator to come to their own conclusions. Those that enjoy this approach to theatre making will find this DVD rewarding and exhilarating.

### SLEEPING BEAUTY, THE - TCHAIKOVSKY/DUTCH NATIONAL BALLET

Tchaikovsky and Petipa's timeless ballet-acknowledged as the most pure and demanding piece in the classic romantic repertoire - is a stunning example of the sparkling virtuosity of Petipa's rich dance vocabulary.

Recorded at Het Muziektheater in Amsterdam with Het Nationale Ballet (The Dutch National Ballet) in 2003, this version was created in 1981 by the English choreographer Sir Peter Wright, whose sensitive staging closely reflects Marius Petipa's original work. In 1989 the ballet was adapted for Het Muziektheater's larger stage. Philip Prowse's ravishing Baroque sets and costumes add the glamour and grandeur essential to a ballet intended for the court of the Russian Tsar.

By William E. Winter, MD, Randie R. Little, PhD, David M. Nathan, MD, and David B. Sacks, MB, ChB, FACP.

While many believe the traditional units used to report HbA1c results work well, results from a recent study called the International A1C-Derived Average Glucose study (ADAG), prompted the American Diabetes Association to recommend that an equation be used to translate HbA1c results into "estimated average glucose," which is reported in the same units that are used in patient self-monitoring of glucose concentrations. This CD-ROM, which contains the proceedings of the "Hemoglobin A1c" audioconference, includes a discussion of estimated average glucose by the lead author of the ADAG study, a discussion of what's new on the standardization front for HbA1C, and an explanation of why more and more diabetes researchers are now recommending using HbA1c as part of a screening strategy for diabetes.

### **FIDEL CASTRO: LIDER MAXIMO**

Directed by Ferruccio Valerio

Cuba is a small beautiful island in the Caribbean sea and was the former pleasure playground for rich Americans. This all changed when a young lawyer named Fidel Castro denounced the American-backed Cuban dictator, Batista, for violating six articles of the constitution at the Supreme Court.

July 26th, 1953 marked the beginning of the Cuban Revolution. Castro's goal was to initiate guerrilla warfare in the countryside in order to overthrow Batista and establish a democratic alternative. After a long bloody battle, the dictator was overthrown, the people rejoiced, the revolution had triumphed and the legend of the 'lider maximo' was born. This program presents the story of Fidel Castro, the symbol and incarnation of Cuba, from his early days right up through his recent transfer of power to his brother Raul.

### **HISTORY OF THE DEVIL, THE**

Satan, Lucifer, the Dark One, the Prince of Darkness... The Devil has had many names and forms over the centuries, and has been blamed for just about every kind of disaster in history.

The History of the Devil charts the evolution the idea of a supreme embodiment of evil from the time of the ancient gods to the present day. This critical analysis provides insightful analysis of the origins of Devil and the way in which it has been used over the centuries.

Beginning with the early days of religion, when there was not a clear distinction between good and evil, The History of the Devil charts the birth of the idea. It was the philosopher Zoroaster who first put forward the notion of simplifying the many different gods into just two - one good and one evil. That idea made its way into Islam and Judaism, and flowed through into Christianity.

During the rule of King James, the Devil became a political tool for both the King and the Church, and a way of maintaining fear and control over the populace. If you didn't support the King then you must be in league with the Devil. This was the time of the fierce Inquisition.

This unique program continues following the historical trail of the Devil through the Age of Enlightenment to the present day where the Prince of Darkness is no longer a supreme evil feared by all, but rather, a modern marketing tool and a Hollywood favorite. This fascinating and informative story is told through archaeological facts, paintings and interviews with academics, historians and church members.

## LITERATURE

### J.R.R. TOLKIEN

This film tells the story of John Reuel Tolkien, English writer, poet, philologist and author of many stories, including most famously The Hobbit, and The Lord of the Rings. It describes the importance of the rural English West Midlands, where Tolkien grew up, in shaping his literary imagination and how the ancient northern languages he studied and taught throughout his life influenced his writing. These factors stimulated him to provide a context in which his own, invented languages might be spoken—an imaginary land called Middle-earth.

Accounts of the origins of The Hobbit and of The Lord of the Rings, and the phenomenal success that Tolkien somewhat reluctantly enjoyed when taken up by the counter-culture of the 1960s are included.

### BETTER WORLD, A: SELF REALIZATION & LIBERATION PART 1

With Pujya Desai

Deepakbhai Part 1: Gnan vidhi is a special initiation designed to give Self-realization. Deepakbhai is the current master who gives gnan vidhi initiation. He is the third master in the lineage called Akram vignan. Akram vignan means a "path to enlightenment that requires no effort". In this path, the Self is awakened and begins to manifest itself into the awareness of the receiver. Ultimately, or in some cases rather quickly, it will manifest as the witness state and then as love-bliss. The first stage of liberation is Self-realization, which is effortlessly attained through the grace of the Gnani Purush (Fully Realized) during the Gnan Vidhi ceremony. During this ceremony, ignorance is dispelled and true knowledge of the Self is revealed. The second stage of liberation is Moksha, or final liberation.. This is attained when there remains no trace of anger, greed, attachment or pride. This process of ego purification unfolds as one follows the five spiritual principles (5 Agnas) which are outlined by the Gnani Purush during the Gnan Vidhi ceremony. In this first of two

interviews, Mitchell helps the viewer become acquainted with this generally unknown but sacred practice from India. His inquiry makes a seemingly esoteric process accessible to the Westerner, as well as, in many cases, very worthwhile. The case for liberation is made!

## **LES BOREADES -JEAN-PHILIPPE RAMEAU/OPERA NATIONAL DE PARIS**

Jean-Philippe Rameau (1683-1764)

This mythical tale of a young queen,

Alphise, determined to abdicate rather than contemplate an enforced marriage to a descendant of Boreas, is nothing less than highly-charged. Her forbidden love for Abaris is reciprocated, but seems hopeless until his divine origins are revealed, where upon darkness is turned to light and Boreas's dingy domain is suffused with glowing colors, both literally and metaphorically.

It is Rameau who emerges as the real hero of Les Boreades, in bold rhythms and daring melodic lines, threatening tempest and torture scenes and uninhibited choruses.

Written in 1763, the opera was abandoned in rehearsal, for reasons still unclear. Rameau died the following year and the work disappeared from public view for more than 200 years. In this production, Director Robert Carsen and his creative team flood the stage by turns with summer blossoms, mountainous piles of autumn leaves, harsh winter snows and thunderous spring storms. The cast of 140, including soloists, chorus and dancers are attired in costumes inspired by late 1940s Dior.

In addition, included is an extra feature, The Triumph of Love, which is a 60-minute documentary including interviews with Robert Carson, William Christie, Barbara Bonney, Paul Agnew and Laurent Naouri.

## **REAL DON GIOVANNI, THE - DOCU-DRAMA WITH OPERA SINGER SIR THOMAS ALLEN**

Shot on location in Prague, Vienna and in Northern Bohemia, this docu-drama attempts to place Don Giovanni's violent and seductive personality in its historical context.

Using dramatization, performance and documentary, the opera singer Thomas Allen argues that the key to understanding Mozart's demonic philanderer is through Giacomo Casanova. Whilst performing the role in contemporary Prague, Allen sets out to prove that the real-life eighteenth century sex maniac was not only a direct influence on Mozart's opera, but that he was involved in its creation. Before long, Allen becomes caught up in the romance of performing this role, and his obsession begins to slip into fantasy.

### **PSA UPDATE: IMPLEMENTING NEW SCREENING GUIDELINES, MEETING ANALYTICAL CHALLENGES**

By Herbert Fritsche, PhD, Bernard Cook, PhD, and Michael LeFevre, MD

The serum prostate specific antigen (PSA) test has become so common in the US that the majority of American men older than 50 now receive it as part of the prostate cancer screening process. In

2008, the U.S. Preventive Services Task Force (USPSTF) offered some new evidence-based recommendations about using PSA to screen for prostate cancer, most notably recommending against using the test to screen men over the age of 75. On this CD-ROM, which contains the proceedings of the "PSA Update" audioconference that was originally held on December 3, 2008, experts discuss what the USPSTF recommends for PSA screening, what other organizations recommend for PSA screening, and how to address potential problems with standardization bias in PSA assays.

This video delves into the history of narcotics such as heroin, opium, codeine, and morphine; the effects of narcotics on the body and the short- and long-term health impacts; and teenage attitudes toward narcotics. In addition, the video considers legalization and regulatory issues involving narcotics, as well as physical and psychological addiction to these potent drugs.

## THEATRE

### CROSSING - DEVSING PERFORMANCE

International Young IDEA Project

Intercultural exchanges between groups of young people committed to Drama and Theatre are now a living priority within IDEA (International Drama, Theatre and Education Association).

In 2005, after one year of developmental discussion, IDEA's Directors of Young IDEA, Projects and Solidarity launched a pilot International Young IDEA Project based on intercultural theatre workshop processes which culminated in a multicultural performance at the IDEA 2007 World Congress.

Based on responses from IDEA's members to the 2005 invitation for participating groups, encounters took place in Mostar (Bosnia-Herzegovina, August 2006), Kaosiung (Taiwan, October/November 2006), Bagamoyo (Tanzania, November 2006) and Minas Gerais (Brazil). Each encounter was accompanied by an IDEA member and evaluated by IDEA's elected Directors in dialogue with the workshop facilitators.

#### DVD 1: Devising Performance

This documentary follows the journey of a group of young people, from all corners of the globe, who were selected to work together for 3 weeks before IDEA 2007 Congress began. Each participant contributed to the intercultural process and multicultural final performance with independent motivation and self-discipline. From the first time they arrived in the studio all activity was recorded: debates, workshops, experiments with techniques and devising tools, individual and collective processes of making artistic decisions - all leading to their powerful final performance. 86 mins

DVD 2: CROSSING - The performance  
The DVD contains three performances from three different "CROSSING" projects one of which is documented on DVD 1. The performances are the outcomes of 3 weeks intensive devising and rehearsing. It is a truly intercultural experience about and for young people in the world. 118 mins

### DR FAUSTUS - AN EXPLORATION OF VOICE, SOUND AND BODY

Workshop and Performance from Voice Theatre Lab

The two disc set features two of Voice Theatre Lab's recent work.

Disk 1: 'Dr Faustus' by Christopher Marlowe, adapted and directed by Robert Lewis is an exploration of voice, sound and body. The production of 'Dr Faustus' explores abstract imagery through voice and body. It was the result of a rigorous training and rehearsal processes undertaken in 2007 and 2008. These performer-generated abstract images, which were inspired by the original text, drew inspiration from Butoh dance. The concept was developed further by incorporating sound, text and vocal exploration through various states of physical 'crisis'. These states of 'crisis' [conceptual, physical and vocal] do not hinder or suppress the vocal expression; rather, it releases a gamut of subconscious and inner essences of the performers by increasing the state of internal energy. 55:30 mins

Disk 2: '5' is training session focusing on vocal actions, energies and the image. It is a filmed, staged workshop; an exploration of devices [exercises, concepts and ideas] used throughout Voice Theatre Lab's 2007 and 2008 training sessions. It is a sequence of short scenes that are interconnected which depict the 5 elements and how they relate to each other. These elements [wood, fire, metal, water, earth] are linked with the voice and its emotional expression to form an abstract exploration of the human voice and body. The training which this film demonstrates was used in the re-mounting of 'Dr Faustus' in 2008. 47:24 mins

## TRAVEL

### DIVE TRAVEL: GRAND BAHAMA ISLAND

With Gary Knapp Divemaster

Grand Bahama island is just one of over 700, in this tropical Bahama island chain, scattered like jewels across a total of 100,000 square miles, in the Atlantic Ocean. Or to put it in prospective, this region is roughly larger than the entire length of Florida, extending this country over 500 miles. On Grand Bahama island the sea has always provided. The earliest settlers were possibly the Siboney Indians, who lived off conch and fishing, they were stone age people who entered the Caribbean about 4,000 years ago, and much much more.

Elevators - gliding easily in their shafts hanging above the abyss. Changing views and perspectives, abstract structures, chromium-plated, glazed, covered with mirrors - a culmination of architectural visions and representation. 1/Reflexions: Structures with the power of hieroglyphs, their notches and forms inspiring the imagination. Pictures appearing like news from an unknown world. Multiplication - the attempt to decode them, apparently working, but the mystery remains.

2/Ready made: Mannequins behind bars - artificial bodies rotating around themselves - presented creatures in an enclosure. Their idealized beauty provokes reflections on appearance and reality. 3/ Mediation: Moving surfaces revealing changing forms, signs and images. Apparently painting themselves and by this abstraction implying something far beyond them. The expanse of water becomes a projection screen, bustling activity - organic structures - watermarks.
